Writing task 4

This society is built on technology. a lot of costumes are being forgotten or berly being used because of the constant use of the electronic devices and social media. In Puerto Rico is very used the communication apps. Example of this apps are Facebook, Twitter, Messenger and WhatsApp. this apps help us to communicate with family that are not living in PR and it's also used as entertainment.

The apps that I most use is WhatsApp and Twitter. I like this apps because it helps me communicate with friends and entertainment at the same time. These two apps are very used in PR by any age who has an electronic device. On the other hand this apps have taken a lot out of cultural things, that Yunque people barely, practice it because of the entertainments this apps provides. Finally people, including me need to start spend less time in our electronic devices and start getting richer in our culture.
